Context and Objectives

This first National Conference on water, environment and renewable energies aims to bring together eminent Algerian university researchers and scientists working on environmental sciences. This event will strengthen links and exchanges in research, contribute to develop networking between scientists, technology transfer and know-how in the field of integrated water resources management and environmental protection in the face of sustainable development issues and challenges, and this for stakeholders (academics, specialists, decision-makers, planners, industrialists, project owners, laboratories, design offices, etc.).

This national scientific meeting will feature plenaries, oral presentations, poster sessions as well as discussion forums on issues related to the seminar themes.

Internationally renowned experts can present their most recent research works, allowing ample time for debate and discussion during and between sessions. The poster sessions will serve as a major forum for the discussion of current projects and innovative ideas.
